## Reos Partners

Reos Partners is an international organisation dedicated to supporting and building capacity for innovative collective action in complex systems. We organise, design, and facilitate results-oriented, multi-stakeholder change processes with corporate, government, and not-for-profit organisations.

Our name comes from the Greek “rheos,” which means “flow” or “stream.”

We work with organisations and systems that are trying to make real progress on complex challenges. Our approach is participatory, creative, systemic, and action-oriented. It is always practical, professional, and specific to the needs of the situation.

We have offices in Cambridge (USA), Johannesburg, London, Melbourne, São Paulo, and The Hague.

Our work has addressed issues such as climate change, sustainability, HIV/AIDS, child well being, agriculture and nutrition, finance, housing, and education. We have led projects on every continent. We have capacity-building courses on systems and scenario thinking, creativity and complexity, and breakthrough innovation. We work at multiple levels—individual, team, community, nation, globe—across multiple sectors and in multiple cultures. For more information, please go to [www.reospartners.com](http://www.reospartners.com).
